 - Watershed Considerations in Park Design
 - Update on Estimated Cost Projections Timeline
 - Higher Cost Centers: Interpretative and Directional Signage, Arbor, Play Area and Other Above Ground Infrastructure Elements i.e. benches, picnic tables, bike racks, etc.
- VI. Sidewalk Repair and Reconstruction 2025-2026 Sam Clarke Report, DPW
 - Loaming and seeding the sides of the areas completed last year to get grass established and improve the overall aesthetics, bringing those sections to full completion.
 - Complete the section from Seamans Road to the Colby Loop exit. After that, we will move to the section from Newport Road to the exit of the SAU school driveway. These two areas are the “must-do” projects for 2026.
 - Our goal is to complete this work as early in the season as possible so residents and visitors can enjoy the improvements sooner.
 - If time and budget allow, we may also be able to complete additional sidewalk footage or smaller repairs in other areas of town, such as Pleasant Street or the Elkins area near the beach.
- VII. Multi-Purpose Trails Update
- VIII. Public Comment
- IX. Adjournment
