

First is an overall view of most of the shorefront. This photo is missing another 20' of shorefront on either side of this photo (the photo is not quite wide enough). On the south side, you will see the three trees in front of the house... there is another very large pine just south of those trees that is not shown.

Next: this is the view along the side showing the fake rock covering the well. Flowers/ferns are planted along the edge of the deck, you can almost see the outline of that area. On the left is the big pine tree that will remain.

This shows the view looking north

Here is the view looking south

This photo shows the area in front of the deck where blueberry bushes are located along with various other plants and flowers. There is not much space here for plantings since the stone wall takes up some of the space. At the base of the stone wall is the water line, which is lower now and not touching the base of the stone wall.
