**2. PROJECT TASKS AND DELIVERABLES – NEW LOCAL HAZARD MITIGATION PLAN**

Project tasks and deliverables within this section are to be referenced for the reimbursement process. Per the Scope of Work, “the Sub-Recipient” is required to develop/update the community’s local hazard mitigation plan in accordance with 44 CFR Part 201 to ensure formal approval.

The Town/City, NH will prepare a Local Hazard Mitigation Plan Update in accordance with FEMA guidelines for Hazard Mitigation Planning. The Town/City may be assisted, by a vendor of their choice, for this scope of work. The Town/City’s updated plan will address mitigation of multiple natural hazards that may affect the community, including Avalanche, Coastal Flooding, Inland Flooding, Drought, Earthquake, Extreme Temperatures, High Wind Events, Landslide, Lightning, Severe Winter Weather, Solar Storms and Space Weather, Tropical and Post-Tropical Cyclones, and Wildfires.

The planning process will include the following actions and elements:

**Task 1-3**

**1. Grant Award and Contracting:**

The community will procure services to facilitate this planning process update

- Official Notification of Award
- Provide Contractor Selection to NH HSEM
- Execute a contract

**2. Select and Hire a Vendor:**

The vendor will document the process used to develop the updated plan, including but not limited to:

Sub-Recipient Initials: 1.)  2.)  3.)  Date:

- How the plan update was prepared
- Who was involved in this process
- How the public was involved (i.e., Community outreach, local planning team participation)

**3. Convene a local Hazard Mitigation Planning Committee:**

The Town/City will convene a local Hazard Mitigation Planning Team. Members should include a cross-section of the community, such as residents, government officials, community leaders and business owners. This team will serve as a liaison to the vendor and assist in the plan update by providing access to relevant local data, facilitating community input on plan recommendations and priorities, reviewing draft products, and assisting with outreach to community stakeholders. With the vendor’s facilitation and technical assistance, the Town/City Hazard Mitigation Planning Team will:

- Develop a mission statement
- Assign roles and responsibilities
- Develop a specific timeline for planning activities
- Hold a minimum of two community public meetings during the planning process update, one during the production of the plan update, and one during the review of the draft plan update,
- Solicit input from key stakeholders in the community, including business associations, local or regional institutions, local NGO’s, and residents.
- Conduct local outreach to stakeholders through postings on the municipal web site, outreach to local print and/or online press, and use of local access cable TV where available. Outreach to neighboring communities will also be conducted.
- Provide input regarding the feasibility and prioritization of mitigation measures
- Review the draft plan update and its goals and proposed mitigation projects
- Oversee the implementation, maintenance and updating of the plan update

**Task 4. Revisit the Hazard Profiles for each Hazard that impacts the community:**

- Using the best available existing data, the vendor will update a map of areas affected by multiple natural hazards for the Town/City. A set of hazard maps will be included within the updated Hazard Mitigation plan, and GIS files will be made available to the Town/City for integration with their other community plans. These maps will be the basis for the communities known hazards. The hazard identification update will include an assessment of the community’s risks that summarizes the vulnerability of each hazard based on the location, extent, probability, and severity of the hazards. A vulnerability analysis will be conducted; your vendor may consider using FEMA’s HAZUS-MH, as well as, a GIS map analysis to delineate those critical facilities that are located within mapped hazard areas.
- The Town/City will update the description and prioritization of the natural hazards that have occurred within the community since the last plan update.

**Task 5. Facility Inventory:**

The Town/City will prepare an updated inventory of facilities and explain how these facilities intersect with the known hazards for the community. This task will be based on input from the community and the best available state and local information. This data may be used to develop updated GIS maps of the following items:

- Critical facilities, including the following, if they exist in the community:
  - Emergency operations centers
  - City or town offices
  - Water and wastewater treatment plants
  - Sewage pumping stations
  - Police or fire stations
  - Schools
  - Hospitals
  - Day-care facilities
  - Public works garages
  - Nursing homes/elderly housing
  - Emergency shelters
- Economic Drivers:
  - Large Businesses
  - Large Employers
  - Historical or Cultural sites
- All repetitive flood loss structures and structures which have incurred substantial damage, if they exist, as defined by FEMA. These buildings(s) must be analyzed by type (Commercial / Residential), number, and general location as it relates to the known hazard areas. The addresses and associated data will be provided, upon request to, the community by the State NFIP Coordinator.
- Land use maps that depict the location of developed land uses, delineated by categories based on use (e.g., residential, commercial, industrial, institutional, other public use, etc.) and how it intersects with known hazards.
- Anticipated future land use areas and how they intersect with known hazards.

**Task 6: Vulnerability:**

Based on the previous information from Task 5, the Town/City will update the overview of each of the specific hazards and the community's vulnerability to those specific hazards. This vulnerability assessment, if possible, will include:

- Problem Statements: These will summarize the biggest issues for the community in terms of: Types and numbers of buildings, infrastructure, and critical facilities located in the hazard areas.
- All existing multiple hazard protection measures within the community, including protective measures under the National Flood Insurance Program (NFIP).
- A description of each measure, the method of enforcement, and/or the point of contact responsible for implementation of each measure.
- Historical performance of each measure and a description of improvements or changes needed.
- General description of land uses and development trends to incorporate future land use decisions.

**Task 7. Mitigation Goals:**

Sub-Recipient Initials: 1.)  2.)  3.)  Date:

The Town/City, with vendor support, will update the mitigation strategies specific to the community's exposure to and impacts from identified natural hazards. The strategy will include:

- Create, edit, or delete goals as needed;
- Obtain public input;
- Analyze existing capabilities;
- Review mitigation actions in the previous plan and identify progress implementing those actions (include current status along with reasons why there may have been little or no progress).
- Describe how the community's priorities have changed since the previous Hazard Mitigation Plan.
- Include a description of the NFIP program and how the community will continue compliance over the next five years.
- Update a list of mitigation goal statements that focus on reducing the risks from the identified natural hazards. The goal development and project prioritization will be conducted by the Hazard Mitigation Planning Team. An example of a goal statement and an objective would be:
  - GOAL: Increase coordination between Federal, state, municipal, and private resources in pre-disaster planning, post-disaster recovery, and continuous hazard mitigation implementation.
  - OBJECTIVE: Identify the availability of additional private and public sector financial incentives for homeowners, businesses and municipalities that will allow the development and implementation of cost-effective hazard mitigation measures in high-risk areas.

#### **Task 8. Actions:**

A section that identifies and analyzes a comprehensive range of specific mitigation actions and projects being considered to reduce the effects of each hazard, with particular emphasis on new and existing buildings and infrastructure. This section will include a list of prioritized hazard mitigation projects that best meet the communities' needs for multiple hazard damage reduction:

- These projects may be non-structural (e.g., planning, regulatory measures, property acquisition, retrofitting, elevation) or structural (e.g., seawalls, dams, dikes) solutions.
- At a minimum, this list of prioritized projects will be based on a process that results in identification of cost-effective hazard mitigation projects with public input, including:
  - An analysis of proposed mitigation projects focused on several key areas, including but not limited to economic (including benefits and costs), engineering, technical, legal, environmental, social, and political feasibility. Selected options will best fit the community's needs and meet most or all aspects of the feasibility analysis.
  - Coordination with relevant Federal and state agencies for input and technical assistance.
- Revise and update the mitigation action plan.
- Identify integration opportunities throughout the community, as well as, how the data and information from the previous plan was integrated into other mechanisms over the last five years

#### **Task 9. Plan Review, Evaluation, and Implementation**

In order to continue to be an effective representation of the jurisdiction's overall strategy for reducing its risks from natural hazards, the mitigation plan must reflect current conditions. This will require an assessment of the current development patterns and development pressures as well as an evaluation of any new hazard or risk information.

- The plan must describe changes in development that have occurred in hazard prone areas and increased or decreased the vulnerability of each jurisdiction since the last plan was approved.

- The plan must describe the status of the hazard mitigation actions in the previous plan by identifying those that have been completed or not completed. For actions that have not been completed, the plan must either describe whether the action is no longer relevant or be included as part of the updated action plan.
- The plan must describe if and how any priorities changed since the plan was previously approved. If no changes in priorities are necessary, plan updates may validate the information in the previously approved plan.

**Task 10. Maintenance:**

- The Town/City in conjunction with the planning team will monitor, evaluate, and update the plan.
- The Planning Team will assist the Town/City in the implementation and incorporation of the plan’s goals into other local planning processes, such as a Comprehensive Plan, or other local by-laws and ordinances.
- The completed plan update will include an implementation schedule with procedures for ensuring the plan’s implementation, updating and revision every five years.

**Task 11. Public Review of Draft:**

- The Planning Team will work with the community for continued public involvement to include public review of the draft plan.

**Task 12. Review and Approval:**
