The Committee discussed and reviewed a draft RFP for the corridor study. The group defined the corridor as the intersection of Main Street and Seamans Road to the New London Shopping Center on Newport Road. The discussion focused on defining the scope of the RFP. Participants agreed that they would prefer to leave to scope open to allow for creative approaches from the consultant.

The group discussed the need to make the scope multi-faceted. The RFP should include not only multi-modal transportation, but the zoning and built environment impacts of the surrounding area.

The group also discussed that the deliverable should include a variety of graphics and schematics, in addition to any written report of the findings and recommendations.

2. **Future Meeting Dates:** July 22, 2021.
