

Take the
Emergency
No Wake Pledge!

Lake Sunapee
Protective Association

Burkehaven Lighthouse under water — Photo by Kara Obey

Unprecedented circumstances require Grassroots Community Action!

Please commit to the LSPA Temporary No Wake Pledge and use your boat at headway speed only until water levels return to normal.

We ask the community to help us protect Lake Sunapee and its watershed.

With your commitment to the LSPA Temporary No Wake Pledge, we can all achieve the following benefits:

- **Protect the Environment including water quality:**

Under these conditions, every wake has the potential to erode shorelines, degrade septic systems, and harm nesting loons.

- **Protect the safety of residents, Marine Patrol, and first responders:**

We must avoid anyone hitting a broken dock or partially submerged tree while using their boat/PWC at speed.

- **Reduce damage to Personal Property:**

Record high lake levels + surf/ski boat wakes = the need for expensive repairs to the lighthouses, docks, cribs, retaining walls, and boathouses
